PROJECTS

Tapsy (Rails, React, Redux)   LIVE | Git Repo
Clone of Untappd, a beer rating/sharing community
- Single-page app with a user activity feed that is customized for each path, storing only relevant information in the application's state
- Photo uploading using Paperclip gem and AWS cloud server
- Uses async AJAX methods to maintain smooth flow while making queries to a large database

Block Out (JavaScript, EaselJS)   Git Repo
Puzzle game with draggable blocks
- Detects collision between shifting HTML Canvas shapes
- Built with multiple game levels of increasing difficulty

Active Data (Ruby, SQL)   Git Repo
A compact version of Rails' system for interacting with a database
- Uses metaprogramming to define association methods that query a relational database

---

SKILLS

Ruby   Rails   JavaScript   ES6   React.js   Redux   SQL   HTML5   CSS3   Git   jQuery

---
